# CONFERENCE
Setting a design standard.

# CONFERENCE – as versatile as you need.

The dimensions of the cut-out are included in the frame packaging materials. They are also available by e-mail or can be downloaded from www.bachmann.com

Simple built-in frame fitting
The built-in frame is very easy to install – only standard tools are required. Simply make a right-angled cut-out in the top of your desk or table.

Built-in frame for underneath a desk or table
Conference under-table mounting frames (frameless) are fitted from the underside of the tabletop. Thus only the pivoting flaps are visible on the tabletop. The drawings containing the special details of the table cut-out are supplied with the unit or can be downloaded from www.bachmann.com. If required, the flaps can be removed from the frame by means of the integrated bayonet catch. A suitable veneer to match the finish of the tabletop can then also be glued to the flaps (not processed ex works).

Power strip simply clicks into place
The power strip is not supplied with the built-in frame and must be ordered separately. It simply clicks into the built-in frame (tools are not required). Since the power strip can be interchanged at any time, the user is guaranteed long-term flexibility and can be sure that the products purchased are fit for the future.
